THE LAW OF BILLS, NOTES, AND CHEQUES—Second Edition. Edited by *Melville M. Bigelow, Ph.D.*, of Harvard. Little, Brown & Co. 1 vol., pp. 349.

The codification of the law of bills, notes, and cheques in many of our states lately, has prompted the author to put forth a second edition of his former work on that subject. This new edition is an up-to-date work in every respect. Not only has Mr. Bigelow improved the subject-matter of the book generally, but has also been successful in his attempts toward improvements of a mechanical nature, which are intended to aid the reader. The addition of side-notes is especially noticeable. Furthermore, the negotiable-instruments law of New York is appended to the book and constant reference is made thereto in the text and notes. This statute has been collated with that of the State of Colorado, and the variations are noted by way of suggesting differences to be looked for. "The Law of Bills, Notes, and Cheques" will meet with great favor, both as a clever scientific exposition of that important subject and as a book for the practical, every-day use of the members of the law profession.
